

Nonquitt Avenue, South Dartmouth, MA

The property was designed as a small family compound in the summer community known as Nonquitt.

Located on a narrow lot, it consists of a four-bedroom main house, a two-car garage with an upstairs guest room, poolhouse and pool. The main house and garage are connected by a covered walk.

The style of the house derives from the eclectic mix of shingle-style, turn-of-the-century houses in the surrounding coastal communities.

The house is 3900 sq ft.
The garage is 1600 sq ft.
