

Chestnut Hill Studio, Newton, MA

A new, two-story, two and a half-car garage with guest quarters above attached to a Victorian house in Newton.

The program also included an addition to the house to accommodate utility spaces such as a side entry and mudroom as well as a pantry/laundry.

The topography required extensive site-work to sensitively integrate the new structures into the mature and well-developed landscape and gardens.

Builder White Rock Construction
Landscape Architect Angela Saltonstall
