

**Pond View, Concord, MA**

A new, 5000 sq ft, wood-frame house situated on a quiet cul-de-sac just outside Concord center.

The massing and language of both interior and exterior reflects many houses in the region built during the eighteenth and nineteenth centuries. In addition to the living and sleeping spaces on the first and second floors, both the walk-out basement and attic are fully utilized for additional bedrooms and auxiliary functions.

**Builder** Jeff Brown Construction  
**Landscape Design** Stephen Stimson Associates
