

The Clock Barn, Carlisle, MA

The Clock Barn is a new 40' x 60' post and beam structure which uses recycled lumber for the frame and sheathing. The various pieces came from several New England states.

The barn is a companion structure to the seventeenth century saltbox house. The building's primary functions include three car stalls, an office and recreational living space.

Builder J.W. Adams Construction
Landscape Design Stephen Stimson Associates
Contractor R.P. Marzilli
